

June 12, 2020

Dear LIAO Yuwen,

**Letter of Commendation for Research Project on post-COVID19 new norms**

1. Thank you for your strong support in the most difficult time of our national level Circuit Breaker period to participate in the meaningful project on post-COVID19 new norm.
2. By doing so, you were bold and ready to adapt the ever-changing project requirement. Working beyond your robotics forte, you have placed project's interest first and picked up new technologies along the way. It is commendable that you sacrifice your university holidays when most of your peers are making full preparation for the new, socially distanced semester ahead.
3. You have demonstrated excellent work ethic and dedication towards the autonomous hospital bed project demonstration. This paves a crucial foundation in realizing the autonomous hospital bed that would minimize cross infection risks among Singapore frontline healthcare workers and patients.
4. Thank you for being part of this team, and we hope you remain with us for the foreseeable future.

Best wishes

Holden Li  
Assistant Professor
